

Aquaglide

Blast Bag™

Description Platinum™ launch bag for water use.

Specifications 12'L x 5.5'W x 36"H

Use the powerful force of air pressure to blast friends, relatives and kids (carefully) into the air for huge thrills, and splashes. Bag attaches to Platinum SuperTramps™ or Rebound™ bouncers using a version of the Interloc™ system designed specifically for the Blast™ Bag.

Blast™ Functional Features

Balance

Incorporates a balance feature.

Build balance skills! This balance feature adds endless excitement to your Platinum™ aquapark.

Launch

Incorporates a launching feature.

For those with a taste for adrenaline, there is nothing more outrageously fun than being blasted into the stratosphere with this launching feature!

Blast™ Technical Features

Duratex™

Commercial grade fabric reinforced PVC material.

Ideally suited for watersports, Duratex™ material is the finest, commercial grade fabric reinforced PVC available. Each Aquaglide Platinum item uses Duratex™ material for maximum strength and durability. The Blast™ incorporates 500d fabric fused with layers of 28 oz PVC.

RF Weld™

Radio frequency welded seams for high quality and outstanding durability.

'RF' or Radio Frequency Welding is the process used to fuse DuraTex™ material seams for years of trouble-free use. RF welding produces clean, strong seams with no unsightly glue marks or splits.

UP Grip™

Incorporates convenient boarding handles that fold flat.

Convenient climbing handles allow for boarding and/or climbing while staying out of the way for other activities. The Blast™ includes 2 boarding handles

Interloc™

Heavy duty stainless fittings and convenient Interloc straps for modular use.

Aquaglide Platinum items connect to one another using the Interloc™ system. Soft webbing offers some flexibility, while remaining tough enough for years of service. Only Interloc™ blends the convenience of a cinch with the security of a locking connection.

3 Year

Limited Warranty against any and all manufacturing defects.

Info: Each Aquaglide Platinum™ item offers a warranty covering any and all manufacturing defects for an extended period of time. The Blast™ includes a 3 Year warranty for recreational use.

UV Block™ Materials specially treated for high resistance to the sun's damaging rays.

Each Aquaglide Platinum item is treated with UV Block™, the highest grade 3-year UV coating available. While we recommend periodic maintenance with additional UV coatings, there is no substitute for having UV Block™ incorporated into the material right from the start. UV Block™, for years of trouble-free use.
