## Discover New Horizons

Multisport™ combines the thrill, excitement and tranquility of sailing into a versatile, compact package that can go anywhere. It costs a fraction of the price of any other sailboat, and offers a much wider range of use.

### Multisport offers Total Versatility

It converts in seconds from a sailboat to a windsurfer, a kayak or even a high performance towable with surprising performance. Use it as a swim platform, fish from it, sleep on it - it's a multipurpose watercraft for the whole family to enjoy.

### Multisport Makes it Easy

Regardless of your age, weight or athletic ability, you will learn to sail or windsurf the very first time you try. The wide stable hull and ultra light rig make it easy for anyone to experience the thrill of sailing. Its lightweight design requires almost no wind to sail, yet the design and durability of the rig can handle winds up to 20 mph (BF5). The Multisport can be used anywhere there's water - lakes, rivers, oceans and ponds. The fins are less than 30cm (12") deep, so the Multisport can be sailed in very shallow waterways and turns on a dime.

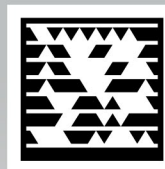

### Compact, Quick and Easy to Assemble

The Multisport hull is inflatable and can be assembled or stowed in the compact roller case in less than 10 minutes - no tools required. The Multisport is compact enough to fit in the trunk of a car, RV or boat locker. Check it as luggage on the airlines or stow it on your boat. Because it's so compact and lightweight, you can take it almost anywhere.

### An Award Winning Design

The Multisport was awarded the IMTEC innovation award from the International Marine Trade Association and the most innovative new product at the Paris Boat Show. It has been featured on the NBC Today show, CNBC, CBS and on many other television, magazine and newspaper presentations across the globe. With more than 40,000 units sold, it has become one of the most popular sailboats in the world. For 2012, we are proud to introduce the next generation - the Multisport 270. With all new components, a larger hull design and new performance sailing rig, the 270 has a much broader wind range, increased upwind ability, and excellent all-round performance. It's the best watercraft value anywhere.
