

Aquaglide

Splashmat™

Description Platinum™ raft and slider.

Specifications 18'L x 5'W x 2"H

The Splashmat™ water float is flexible, slippery and downright wiggly. Fantastic fun for up to eight people. The advanced 'drop-stitch' material is incredibly durable, yet extremely low profile for easy boarding and maximum 'splash-factor.' Use as a stand-alone item or an island attachment for nearly any Platinum™ water toy. Attaches at one end using the Interloc system. Includes carry bag and foot pump.

Splashmat™ Functional Features

Balance

Incorporates a balance feature.

Build balance skills, spar with a friend, or create a challenge course. This balance feature adds endless excitement to your Platinum™ aquapark.

Slide

Incorporates a sliding feature.

Capture the essence of the aquapark experience! Surprising as it sounds, few things are more fun than sliding off a Splashmat™. See for yourself!

Splashmat™ Technical Features

Duratex™

Commercial grade fabric reinforced PVC material.

Ideally suited for watersports, Duratex™ material is the finest, commercial grade fabric reinforced PVC available. Each Aquaglide Platinum™ item uses Duratex™ material for maximum strength and durability. The Splashmat™ incorporates 500d fabric fused with layers of 28 oz PVC.

Dropstitch

Durable fibers that make a very high-tech, low-profile inflatable floor.

Interloc™

Heavy duty stainless fittings and convenient Interloc straps for modular use.

Aquaglide Platinum™ items connect to one another using the Interloc™ system. Soft webbing offers some flexibility, while remaining tough enough for years of service. Only Interloc™ blends the convenience of a cinch with the security of a locking connection.

3 Year

Limited Warranty against any and all manufacturing defects.

Info: Each Aquaglide Platinum™ item offers a warranty covering any and all manufacturing defects for an extended period of time. The Splashmat™ includes a 3 Year warranty for recreational use.

UV Block™ Materials specially treated for high resistance to the sun's damaging rays.

Each Aquaglide Platinum™ item is treated with UV Block™, the highest grade 3-year UV coating available. While we recommend periodic maintenance with additional UV coatings, there is no substitute for having UV Block™ incorporated into the material right from the start. UV Block™, for years of trouble-free use.

En Compliant

This product complies with all DIN EN 15649 product safety standards.
